| No | Pernyataan                                                                                                         | Benar | Salah |
|----|--------------------------------------------------------------------------------------------------------------------|-------|-------|
| 1  | Diare Adalah buang air besar lebih dari tiga kali sehari dengan konsistensi tinja cair atau lembek.                | ✓     |       |
| 2  | Diare termasuk penyakit pada system pernafasan                                                                     |       | ✓     |
| 3  | Salah satu tanda diare adalah buang air besar cair disertai muntah, nafsu makan menurun, dan gelisah.              |       | ✓     |
| 4  | Diare dapat menyebabkan kehilangan cairan tubuh (dehidrasi).                                                       | ✓     |       |
| 5  | Gejala dehidrasi pada anak antara lain mata cekung, bibir kering, anak lemas, dan frekuensi BAK berkurang.         | ✓     |       |
| 6  | Botol susu yang tidak bersih dapat menjadi media berkembangnya kuman penyebab diare.                               | ✓     |       |
| 7  | Diare hanya disebabkan oleh faktor keturunan                                                                       |       | ✓     |
| 8  | Virus, bakteri, makanan yang tidak higienis, serta air minum yang tercemar dapat menjadi penyebab diare.           | ✓     |       |
| 9  | Diare yang dibiarkan tanpa penanganan dapat menyebabkan kematian.                                                  | ✓     |       |
| 10 | Pencegahan diare dapat dilakukan dengan mencuci tangan pakai sabun sebelum makan dan setelah buang air besar.      | ✓     |       |
| 11 | ASI eksklusif tidak bermanfaat dalam mencegah diare.                                                               |       | ✓     |
| 12 | Memberikan makanan tambahan yang bersih dan bergizi dapat mencegah diare pada balita.                              | ✓     |       |
| 13 | Pemberian cairan oralit penting untuk menggantikan cairan tubuh yang hilang akibat diare.                          | ✓     |       |
| 14 | Anak yang sedang diare sebaiknya tetap diberi ASI atau makanan sesuai usianya.                                     |       | ✓     |
| 15 | Membawa anak ke fasilitas kesehatan penting bila diare tidak membaik dalam 2-3 hari atau disertai dehidrasi berat. | ✓     |       |

### Summary (section 1/2)

Location of suspect texts in the document :

Included in the suspicious text score :

#### Similarities

**28%**

Passages with similarities to sources found in different collections.

#### AI detection

**3%**

Texts with stylistically similar formulations to AI-generated text. This rate is an indicator, not proof. Check with the author that he/she has mastered the knowledge mentioned in the document.

#### Unrecognized languages

**<1%**

Passages in which some of the vocabulary used is not part of the language dictionary. This may be an attempt by the author to modify the text to make detection impossible.

Not included in the percentage of suspicious texts :

#### Texts between quotes

**<1%**

Passages between quotation marks, often revealing a quotation.
